Unix Server Tech Knowledge Base

The Unix Server Tech Knowledge Base is an offering of Daily Data, Inc. Daily Data is a provider of Unix, Apple and Windows services in the Dallas/Fort Worth area of Texas (USA).

While we say “Unix” Server Tech, we also include information for Microsoft Windows, Apple OS X and, of course Linux (OSX and Linux are two of the more widely known versions of Unix).

Content this site is created by Daily Data technicians, and is mainly for our internal notes, but we hope that some of it may be useful for others. Feel free to use the information provided, and if you find something that should be changed, contact us at our Contact Us Page (just use the General category).

NOTE: For some of our basic applications, and for some extended articles, see https://unixservertech.com/

This Knowledge Base is broken down into the following, broad categories:

- Unix
  - FreeBSD Unix
  - Linux
  - Apple OS-X
- Microsoft Windows
- Other

Contact Authors

Feedback, feedback, feedback. If you see errors, want to suggest some enhancments, whatever, fill out our Contact Form. We're always happy to hear about problems and solutions.

Disclaimer

I am using AI to reformat and clear up articles occassionally. I'll try to be better about noting it in the article(s) when I do it. However, when I (Rod) use AI, I create the article myself, allow AI to refomat and rewrite parts of it, then review for accuracy.

At this point (2026-02-02), only two or three of the newest articles were written with AI cleanup. You'll note them; they are easier to understand.
